Subject: RE: Dominion Possum Point schedule / outfall need for DEQ
Attachments: Phase I Sequencing Narrative Revised (2).docx

All,

Amelia, Oula and I reviewed the phasing plans, schedule, and narrative. Here are our comments:

- Breaking the project into phases is an effective way to display the information
- The aerial photos showing the wastewater flow paths within each phase is also an effective way to display this information
- We have some suggestions for the narrative description:
 - Because the purpose of this exercise is to show and describe for DEQ the expected changes related to each existing outfall, we think it would be better to present the information in that way. We've rewritten the Existing and Phase I sections of the narrative to give you an idea of what we're thinking (see attached).
- The schedule may be OK depending upon the level of detail that is provided in the narrative for each phase.

Ken

Bob/Mike/Ken,

I attached the Phasing Plans, Bar Chart Schedule, and Narrative for your review. Scott Quinlan and Mike Glagola are discussing these documents with the Station today.

Thanks,

John

Subject: Dominion Possum Point schedule / outfall need for DEQ

John,

Rather than call you again, here is a reminder/status email on the request we made this past Tuesday.

Recall that we need a bar chart schedule correlating the work activity with what is going out the affected outfalls. We need this by Tuesday afternoon 4/7. It will be reviewed by Dominion environmental on Thursday 4/9.

Thanks

Bob Jackson
